Professional Summary

Security Engineer & Full-Stack Developer with **3 years of experience** at Hubstream, specializing in **SSDLC implementation**, **Security Automation**, and **Zero Trust architecture**. Expert in orchestrating automated SAST/DAST/SCA pipelines and conducting LLM-powered threat modeling (STRIDE/PASTA). Proven track record in migrating legacy .NET systems to modern Core frameworks and upgrading enterprise TypeScript codebases. Strong foundation in incident response, compliance standards (GDPR, HIPAA, SOC), and cloud-native security guardrails.

Core Competencies & Skills

Security Operations: SSDLC Implementation, Threat Modeling (STRIDE, PASTA), Zero Trust Model, Penetration Testing, Incident Response (Phishing, Log Analysis), Patch Management, OWASP Top 10, MITRE ATT&CK.

Automation & Tools: Snyk, SonarQube, ZAP API, ESLint, Azure Advanced Scan, Playwright, Docker, CI/CD Security Integration, Phishing Simulation Campaigns.

Engineering: Full-Stack Development (.NET 9, .NET Core, Angular), TypeScript (v4.7 to 5.9), MSSQL, Python Automation, Multithreading, System Migration, DP Installer Development.

Compliance & Infra: GDPR, HIPAA, ISO, SOC 1/2/3, Hardware-Defined Firewalls, IDS/IPS, Azure/AWS IAM Policy & Cloud Guardrails.

Professional Experience

Hubstream India Pvt Ltd — **Chennai, India**
Software Engineer (Security & Full-Stack) — *Mar 2023 – Present*

Security Engineering & SSDLC Leadership:

- **SSDLC Implementation:** Architected the Security Software Development Lifecycle, automating **SAST, DAST, and SCA** into weekly tests and nightly build cycles, including Azure Advanced Scans.
- **Threat Modeling:** Performed deep-dive threat analysis on existing and new systems using LLMs and frameworks like **STRIDE and PASTA** to ensure security by design.
- **Risk & Compliance:** Reduced organizational risk by enforcing **GDPR, HIPAA, ISO, and SOC 1/2/3** standards. Successfully implemented hardware-defined firewalls and IDS/IPS strategies.
- **Zero Trust Advocacy:** Led the *"Trust Null"* Security Team with the mission of implementing a Zero Trust model and contributing to company-wide security policies.
- **Incident Response:** Handled high-priority incidents including phishing threats, password leaks, and log forensic analysis; found and patched multiple critical security vulnerabilities.
- **Security Awareness:** Organized and executed employee-wide security training programs and phishing simulation campaigns from entry-level to executive leadership.

Product Engineering & Modernization:

- **System Migration:** Spearheaded the migration of legacy .NET Framework/Standard servers to **.NET 9** and upgraded TypeScript codebases from **v4.7 to v5.9**.
- **Installer Development:** Developed a secure **DP Installer** for the core product that automates server configuration, database setup, and rule enablement with security as a primary focus.
- **Innovation & R&D:** Contributed to R&D projects including **Playwright/Docker PoCs** for parallel UI testing and optimized marketing tech through SEO/AEO/GEO strategies.

Awards & Recognition

Innovation Award: **Internal Hackathon Winner:** Automated repeated workloads (CSV data creation) using Azure's GPT models before the mainstream AI boom.

Recognition Award: Awarded for exceptional performance in identifying and patching critical production vulnerabilities and stabilizing product quality.

Projects

Academic Project

Blockchain-Based Decentralized Storage System

- Developed a distributed storage system using blockchain, smart contracts, and IPFS to ensure data immutability and secure access control.

Academic Project

AI-Powered Facial Recognition Attendance System

- Built a real-time system using Python, OpenCV, and ML models, achieving 95% recognition accuracy.

Education

BS Abdur Rahman Crescent Institute of Science and Technology **Chennai**

B.Tech in Information Technology

CGPA: 8.75/10

Additional Highlights

- **Invited Guest Lecturer:** Delivered expert sessions on AI and Cybersecurity at various academic institutions.
- **Technical Evangelist:** Actively involved in security policy development and privacy-related challenges at the organizational level.
