1 PROFESSIONAL SUMMARY

Full-Stack .NET Developer and **Application Security Engineer** with 3+ years of experience building secure, scalable web applications. Proficient in **C# / ASP.NET Core**, **Angular / TypeScript**, and **Azure** cloud services. Seeking roles in **Full-Stack .NET Development**, **Junior Cloud Security Engineering**, or **Cyber Security Automation**.

2 PROFESSIONAL EXPERIENCE

2.1 Full-Stack .NET Developer & Application Security Engineer

HUBSTREAM INDIA PVT LTD, Chennai

March 2023 – Present

- Designed and developed **RESTful APIs** and **microservices** using **ASP.NET Core**, following clean architecture and SOLID principles; consumed by **Angular** and **TypeScript** front-end applications.
- Built and maintained **Azure**-hosted web applications using **Azure App Service**, **MS SQL**, **Azure Blob Storage**, and **Azure Service Bus**; leveraged **Azure Key Vault** for secrets management and least-privilege access.
- Integrated **OAuth 2.0 / OpenID Connect** (Azure AD / Entra ID) for authentication and role-based authorisation across multi-tenant SaaS products.
- Managed application security using **SonarQube** and **Snyk**; enforced least-privilege access, encryption, and network controls via automated guardrails.
- Built **DevSecOps** pipelines integrating SAST (SonarQube), DAST (OWASP ZAP), and SCA (Snyk) into **Azure Pipelines** and **GitHub Actions**, reducing vulnerability remediation time by 40%.
- Conducted threat modelling (**STRIDE**) and **Zero Trust** workshops, leading to identity-centric access controls and reduced blast radius.
- Automated compliance evidence collection for **SOC 2** using Vanta.
- Conducted organisation-wide **security awareness** initiatives and simulated **phishing tests**, strengthening human-centric security posture.
- Engineered **AI agents** via agentic development frameworks and implemented **RAG (Retrieval-Augmented Generation)** pipelines integrated with **n8n** workflow automation to streamline security operations and automated incident response playbooks.

3 PROJECTS

3.1 .NET Framework to .NET Core Migration

- Contributed to the migration of a legacy **.NET Framework** application to **.NET Core** (latest), modernising the codebase for cross-platform compatibility and improved performance.
- Refactored existing modules to align with **ASP.NET Core** conventions, resolving breaking API changes and dependency incompatibilities across the upgrade path.
- Validated application behaviour post-migration through integration testing, ensuring feature parity and stability in the updated runtime.

4 TECHNICAL SKILLS

- **Back-End:** C# (.NET 4.8 to 10), ASP.NET Core, SignalR, Blazor Server, gRPC
- **Front-End:** Angular, TypeScript, HTML, CSS
- **Cloud & DevOps:** Azure (App Service, MS SQL, Blob Storage, Service Bus, Functions, Key Vault, Entra ID / AD B2C), Docker, GitHub Actions, Azure Pipelines
- **Databases:** MS SQL Server
- **Auth & Identity:** OAuth 2.0, OpenID Connect, Azure AD / Entra ID, JWT
- **AppSec & DevSecOps:** SAST/DAST/SCA, OWASP Top 10, Burp Suite, Snyk, SonarQube, CI/CD security gates, Phishing Simulations
- **Automation & AI:** Agentic AI Development, RAG (Retrieval-Augmented Generation), n8n Workflow Automation, Azure OpenAI
- **Programming:** Python, Bash, PowerShell, SQL
- **Compliance:** SOC 2

5 EDUCATION

B.Tech in Information Technology – B. S. Abdur Rahman Crescent Institute of Science and Technology, Chennai
CGPA: 8.75/10
